

Bryan T. Weinstein

25 Dighton St, Apt. 1 (585) 738-0690
Brighton, MA 02135 bweinstein@seas.harvard.edu

Work Experience

- **MITRE** Bedford, MA
Senior Modeling and Simulation Engineer/Analyst September 2018 –
September 2018 - October 1st 2019
 - * Recruited many students at career fairs through academic engagement, and drew people to CUIC team (at least 4 people hired or interned)
 - * Helped save the Functional Architecture December demo for a sponsor
 - * Started the AFSIM user community at MITRE, taught many courses
 - * Attended AFSIM user community meeting October 2018
 - * Maintained interim security clearance, obtained full secret, working on Top Secret
 - * Helped to point the Functional Architecture in the correct direction. Now building it in AFSIM.
 - * Gave talk at MDC2 flip the script talk to preston Dunlap and AFWIC general
 - * Presented at the AFSIM usergroup meeting about MITRE platforms

Education

- **Harvard University** Cambridge, MA
PhD in Applied Physics May 2018
 - Thesis Title: *Microbial Evolutionary Dynamics and Transport on Solid and Liquid Substrates*
 - Advisors:
 - * David R. Nelson: Professor of Physics and Applied Physics, Solomon Professor of Biophysics
 - * Andrew W. Murray: Herschel Smith Professor of Molecular Genetics, Professor of Molecular and Cellular Biology, Director of FAS Center for Systems Biology
 - Additional members of thesis committee:
 - * Christopher Rycroft
 - * Michael Brenner
- **Harvard University** Cambridge, MA
PhD Secondary Field: Computational Science and Engineering (CSE) May 2018
 - Completed four advanced applied math and scientific computing courses
 - Learned state-of-the-art computational methods used in scientific research
 - **Capstone:** OpenCL GPU-powered Lattice Boltzmann fluid mechanics simulation utilizing OpenGL for real-time visualization.
- **Harvard University** Cambridge, MA
S.M. in Applied Physics November 2014
 - Completed 12 courses: 4 physics core courses, 4 CSE courses, and 4 soft-matter/biophysics electives
 - GPA: 3.95/4.00
- **Case Western Reserve University** Cleveland, OH
Bachelor of Science in Engineering, Engineering Physics May 2012
 - GPA: 4.00/4.00, Summa Cum Laude, Valedictorian
 - Engineering Concentration: Aerospace Engineering
 - Senior Project: Simulating Interactions between Confined Spins and Ferromagnetic Vortices
- **Fairport High School** Fairport, NY
High School May 2012

- GPA: 98.7/100, Class Valedictorian of 598 students

Graduate Fellowships and Awards

- **Institute for Applied Computational Science Scholarship** Cambridge, MA
Harvard University Graduate Student September 2016 - September 2017
 - Wrote proposal and won a \$25,000 student scholarship from Harvard’s Institute for Applied Computational Science (IACS)
 - Used funds to develop a GPU-powered Lattice Boltzmann fluid mechanics simulation
- **Certificate of Distinction in Teaching** Cambridge, MA
Bok Center, Harvard University September - May 2016
 - Won a teaching award based on my high reviews of ”Introduction to Applied Mathematics” taught to undergraduates; obtained a 4.86/5.00
- **Department of Energy Office of Science Graduate Fellowship** Washington, D.C.
Harvard University Graduate Student September 2012 - September 2015
 - Wrote proposal to win competitive fellowship supporting students pursuing training in areas relevant to Department of Energy (DOE)
 - Selected out of 1,300 applicants; 50 fellowships awarded
 - Attended yearly conferences at National Laboratories; presented posters on my active research, networked with other DOE fellows and government officials
- **Harvard University Pierce Fellow** Cambridge, MA
Harvard University Graduate Student September 2012 - September 2015
 - Won fellowship awarded to the highest caliber PhD students accepted into Harvard’s School of Engineering and Applied Sciences (SEAS)
 - Selected out of 150 students; 8 fellowships awarded

Publications

- [1] Bryan T. Weinstein, Maxim O. Lavrentovich, et al. “Genetic Drift and Selection in Many-Allele Range Expansions”. In: *PLOS Computational Biology* 13.12 (Dec. 2017). Article chosen for journal cover photo, e1005866. URL: <http://dx.plos.org/10.1371/journal.pcbi.1005866>.
- [2] B. T. Weinstein, S. Atis, et al. “Microbial Range Expansions on Liquid Substrates”. In: *Physical Review X* 9.2 (June 2019). First co-author. DOI: 10.1103/physrevx.9.021058.

Conferences and Invited Presentations

- [1] Bryan T. Weinstein, Severine Atis, et al. “Experimental Population Dynamics in Fluid Flows”. In: *Annual Meeting of the International Physics of Living Systems (iPoLS) Network*. Poster Presentation. Harvard University, July 2016.
- [2] Severine Atis, Bryan T. Weinstein, et al. “Experimental Population Dynamics in Fluid Flows”. In: *American Physical Society, March Meeting*. Presentation. New Orleans Morial Convention Center, Mar. 2017.
- [3] Bryan T. Weinstein, Maxim O. Lavrentovich, et al. “Diffusion and Selection in Many-Allele Range Expansions”. In: *Bulletin of the American Physical Society*. Presentation. New Orleans Morial Convention Center, Mar. 2017.
- [4] S. Atis, B. T. Weinstein, et al. “On Growth and Form of Range Expansions at Liquid Interfaces”. In: *Bulletin of the American Physical Society*. American Physical Society. Los Angeles, CA, Mar. 2018.

- [5] Bryan T. Weinstein. “MDC2 Base Types: a repository of platforms that makes AFSIM more user friendly”. In: *Spring AFSIM User’s Conference*. Presented a talk on creating an unclassified repository of blue assets for AFSIM. Beaver Creek, Ohio, Mar. 2019.
- [6] Bryan T. Weinstein. “Strike Task Broker”. In: *Multi-Domain Command and Control Advanced Battle Management System: Flip the Script Pitch Event*. Presented to Chief Architect of Airforce, Preston Dunlap, and 1-star general about work. John Hopkins University Applied Physics Laboratory, June 2019.

Summer Schools

- **Marine Biological Laboratory Physiology Course** Woods Hole, MA
Student June 2014 - August 2014
 - Applied and accepted into intense 7 week course focused on intersection of experiment and theory in cellular physiology
 - Learned how to use state-of-the-art microscopy to examine cellular behavior
 - Interacted with leading cellular physiology researchers in daily lectures and seminars
 - Course taught by Rob Phillips, Jennifer Lippincott-Schwartz, Wallace Marshall

Graduate Research

- **Harvard University** Cambridge, MA
David R. Nelson & Andrew Murray: Physics, Molecular and Cellular Biology Sept 2013 - Present
 - Combined nonequilibrium statistical mechanics and experimental molecular biology to quantify the evolutionary dynamics of microbial range expansions
 - Learned experimental biology techniques (trained in Dr. Andrew Murray’s Lab)
 - Captured images via microscopy; utilized Python and ImageJ extensively for analysis
 - Devised algorithms to analyze and visualize large sets of biological data
 - Developed agent-based and Lattice-Boltzmann simulations of range expansions in Python, C++, and OpenCL
 - Used OpenFoam and the Lattice-Boltzmann technique to simulate fluid flows
 - Created analytical models utilizing stochastic methods to predict experimental results

Specialized Skills

- **Computational**
 - Secondary Field in Computational Science and Engineering (PhD minor)
 - * Significant experience optimizing programs to run on multiple processors, graphics processing units, and supercomputers.
 - * Excellent at designing and running simulations to gain insight into complicated problems
 - * Knowledge of stochastic and probabilistic methods to solve high-dimensional problems
 - Software:
 - * Languages for Scientific Computing:
 - Python, Cython, OpenCL, CUDA, C, C++, Java, Matlab, Mathematica
 - * Tools for Fluid Mechanics Simulations:
 - Lattice Boltzmann Method (custom-built code), OpenFOAM, SALOME
 - * Image Analysis Tools:
 - ImageJ, Python, OpenCL, OMERO
 - * Other Selected Languages & Programs :
 - Netlogo, Axiovision, Origin, Igor, Bash, L^AT_EX, Windows Powershell, Wordpress, HTML, CSS
 - Hardware:
 - * Build customized computers for scientific applications

- **Analytical**
 - Expert knowledge of Applied Mathematics, especially partial differential equations and stochastic methods
 - Deep understanding of state-of-the-art equilibrium and nonequilibrium statistical physics methods
- **Laboratory**
 - 4 years of research in an experimental molecular biology laboratory; experienced at designing and conducting experiments
 - Significant experience using microscopy to image microbes

Certifications / Clearances

- **Engineer in Training (EIT)** Ohio
Active September 2012
 - Successfully passed Fundamentals of Engineering Exam, the first step towards becoming a licensed engineer
- **Secret Clearance** MITRE, Bedford MA
Active September 2018
- **Interim Top Secret Clearance** MITRE, Bedford MA
Active April 2018

Professional Organizations

- Tau Beta Pi Engineering Honor Society
- American Physical Society

Teaching Experience

- **Introduction to Applied Mathematics** Harvard University
Teaching Fellow September – May 2016
 - Undergraduate course taught by Christopher Rycroft. I obtained a 4.86/5.00 on teaching reviews
 - Won a teaching award, the Certificate of Distinction in Teaching from the Bok Center, for the high teaching reviews
- **Statistical Physics** Harvard University
Teaching Fellow Fall 2017
 - Graduate course taught by David Nelson, my PhD advisor. I obtained a 4.35/5.00 on teaching reviews

Outreach

- **Adopt a Physicist** <https://www.adoptaphysicist.org/>
Classroom Discussion Facilitator October 2018
 - Answered questions about being a physicist to high school physics classes in an online forum
 - Helped make students excited about physics
- **STEM Inspiration Organization (SIO)** Newton, MA
Interview October 2018
 - Participated in hour long interview to organization supporting high school students interesting in pursuing careers in STEM fields
 - Discussed my career trajectory and life lessons that I learned along the way
 - Transcript of interview can be seen here

- **Science in the News Presentation** Cambridge, MA
Physics of Evolution November 2014
 - Described how physics-based models can be used to predict evolutionary trajectories to the public in a 1.5 hour talk
 - Presentation and was given to approximately 100 members of the public at Harvard Medical School
 - Worked closely with teammates to create an effective presentation

Undergraduate CV

Undergraduate Research

- **Rochester Institute of Technology** Rochester, NY
George Thurston: Physics May 2010 - August 2012
 - Studied liquid crystal mixtures in the eye related to cataracts
 - Developed computer simulations and animations with Mathematica
 - Demonstrated how liquid crystal composition affects the refractive index of the eye
 - Validated simulations with experimental data
 - Prepared results for scientific publication
- **Case Western Reserve University** Cleveland, OH
Jesse Berezovsky: Physics Aug 2010 - May 2012
 - Examined control of optically active nanocrystal quantum dots (QDs) at room temperature using microscopic ferromagnet magnetization dynamics
 - Studied novel combinations of QDs and microscopic ferromagnets using the “Object Oriented Micro-Magnetic Framework” developed by National Institute of Standards and Technology
 - Analyzed data from simulations with Matlab and other Linux-based tools
 - Created custom animations to visualize simulations
 - Identified ferromagnet-spin interactions relevant to room-temperature quantum computing
- **Princeton Plasma Physics Laboratory** Princeton, NJ
Harry Mynick: Theory and Computation Department May 2011 - Aug 2011
 - Participated in “Science Undergraduate Laboratory Internship” through Department of Energy
 - Designed graphical front end for previously developed Mathematica program that calculated important plasma physics quantities
 - Utilized state-of-the-art computer cluster for scientific computing
 - Distributed redesigned program to plasma physicists for broad usage
- **Case Western Reserve University** Cleveland, OH
Corbin Covault: Physics Sep 2009 - May 2010
 - Identified faulty equipment at the Pierre Auger Cosmic Ray Observatory by analyzing data collected by 1600 Cherenkov surface detectors
 - Created programs to monitor detector performance in real time
 - Used findings to design improved surface detectors being built at “Northern Auger Site” in Colorado
- **Case Western Reserve University** Cleveland, OH
Mark Gridley: SAGES department Jan 2009 - Aug 2009
 - Designed a psychology study examining cross-modal perception of music
 - Administered study to over 50 participants and analyzed results
 - Co-authored a paper that was subsequently published in a peer-reviewed journal

Undergraduate Awards

- **Case Alumni Association Prize** Cleveland, OH
Case Western Reserve University 5/2012
 - Awarded to the graduating senior with the best academic record in the Case Western School of Engineering.
- **Elmer C. Stewart Memorial Award** Cleveland, OH
Case Western Reserve University 5/2012

- Awarded to an outstanding senior in Physics who has demonstrated achievement in the applications of physics.
- **B.S. Chandrasekhar Prize** Cleveland, OH
Case Western Reserve University 5/2011
 - Received for demonstrating superior performance in physics.
- **Rochester Engineering Society Scholarship** Rochester, NY
Rochester Engineering Society 5/2011
 - Merit-based award recognizing outstanding engineering, engineering technology, science, or technology students from the Rochester area.
- **Outstanding Junior Award** Cleveland, OH
Case Western Reserve University 5/2011
 - Awarded to juniors with the best academic record at the end of five semesters in the Case School of Engineering.
- **National Edward O'Connor Scholarship** Cleveland, OH
Aerospace States Association 8/2010
 - Awarded to enterprising and innovative students planning to pursue career in Aerospace Engineering; only two scholarships given in the nation.
- **Case Alumni Scholarship** Cleveland, OH
Case Western Reserve University 5/2010
 - Competitive award given to undergraduates pursuing degree related to applied science.
- **Outstanding Sophomore Award** Cleveland, OH
Case Western Reserve University 5/2010
 - Awarded to sophomores with the best academic record at the end of three semesters in the Case School of Engineering.
- **Provost's Scholarship** Cleveland, OH
Case Western Reserve University 8/2008
 - Received when entering Case Western Reserve University based on high-school accomplishments (was high school valedictorian of class of 598 students).
