

Bryan T. Weinstein

232 Willow Avenue
Somerville, MA 02144

(585) 738-0690
bweinstein@seas.harvard.edu

Education

- **Harvard University** Cambridge, MA
PhD in Applied Physics Expected May 2018
 - Advisors:
 - * David R. Nelson: Professor of Physics and Applied Physics, Solomon Professor of Biophysics
 - * Andrew W. Murray: Herschel Smith Professor of Molecular Genetics, Professor of Molecular and Cellular Biology, Director of FAS Center for Systems Biology
 - GPA: 3.96/4.00

PhD Secondary Field: Computational Science and Engineering Expected May 2018

 - Completed four advanced applied math and scientific computing courses
 - Learned state-of-the-art computational methods used in scientific research

S.M. in Applied Physics Expected May 2014

 - Completed 10 courses
- **Case Western Reserve University** Cleveland, OH
Bachelor of Science in Engineering, Engineering Physics May 2012
 - GPA: 4.00/4.00 (Summa Cum Laude)
 - Engineering Concentration: Aerospace Engineering
 - Senior Project: Simulating Interactions between Confined Spins and Ferromagnetic Vortices

Fellowships

- **Department of Energy Office of Science Graduate Fellowship** Washington, D.C.
Graduate Student September 2012 - September 2014
 - Wrote proposal to win competitive fellowship supporting students pursuing training in areas relevant to Department of Energy (DOE)
 - Selected out of 1,300 applicants; 50 fellowships awarded
 - Attended yearly conferences at National Laboratories; presented posters on my active research, networked with other fellows and government officials
- **Harvard University Pierce Fellow** Cambridge, MA
Graduate Student September 2012 - September 2014
 - Won fellowship awarded to the highest caliber PhD students accepted into Harvard's School of Engineering and Applied Sciences (SEAS)
 - Selected out of 150 students; 8 fellowships awarded

Graduate Research

- **Harvard University** Cambridge, MA
David R. Nelson & Andrew Murray: Physics, Molecular and Cellular Biology Sept 2013 - Present
 - Combined nonequilibrium statistical mechanics and experimental molecular biology to quantify the evolutionary dynamics of microbial range expansions
 - Learned experimental biology techniques (trained in Dr. Andrew Murray's Lab)
 - Captured images via fluorescent microscopy; utilized Python and ImageJ extensively for analysis
 - Devised algorithms to analyze and visualize large sets of biological data

- Developed simulations of range expansions in Python and C++

- **Harvard University** Cambridge, MA
Phillipe Cluzel: Applied Physics, Molecular and Cellular Biology *Jan 2013 - Sept 2013*
 - Extended previous model to predict how spherical tumors respond to pairwise combinations of drugs
 - Learned tissue culture techniques and grew multiple tumor cell lines
 - Imaged tumors using standard microscopy techniques; used ImageJ to determine their sizes
 - Installed and maintained an OMERO image analysis server to store and quantify images
- **Harvard University** Cambridge, MA
Joanna Aizenberg: Materials Science, Chemistry, Chemical Biology *Sept 2012 - Jan 2013*
 - Studied the mechanism by which water droplets coordinate their motions and form patterns on biomimetic hydrophobic surfaces
 - Tracked motion of hundreds of randomly moving and merging droplets using ImageJ
 - Created simulation in C++ to model droplet motion and compared with experimental results

Undergraduate Research

- **Rochester Institute of Technology** Rochester, NY
George Thurston: Physics *May 2010 - August 2012*
 - Studied liquid crystal mixtures in the eye related to cataracts
 - Developed computer simulations and animations with Mathematica
 - Demonstrated how liquid crystal composition affects the refractive index of the eye
 - Validated simulations with experimental data
 - Prepared results for scientific publication
- **Case Western Reserve University** Cleveland, OH
Jesse Berezovsky: Physics *Aug 2010 - May 2012*
 - Examined control of optically active nanocrystal quantum dots (QDs) at room temperature using microscopic ferromagnet magnetization dynamics
 - Studied novel combinations of QDs and microscopic ferromagnets using the “Object Oriented Micro-Magnetic Framework” developed by National Institute of Standards and Technology
 - Analyzed data from simulations with Matlab and other Linux-based tools
 - Created custom animations to visualize simulations
 - Identified ferromagnet-spin interactions relevant to room-temperature quantum computing
- **Princeton Plasma Physics Laboratory** Princeton, NJ
Harry Mynick: Theory and Computation Department *May 2011 - Aug 2011*
 - Participated in “Science Undergraduate Laboratory Internship” through Department of Energy
 - Designed graphical front end for previously developed Mathematica program that calculated important plasma physics quantities
 - Utilized state-of-the-art computer cluster for scientific computing
 - Distributed redesigned program to plasma physicists for broad usage
- **Case Western Reserve University** Cleveland, OH
Corbin Covault: Physics *Sep 2009 - May 2010*
 - Identified faulty equipment at the Pierre Auger Cosmic Ray Observatory by analyzing data collected by 1600 Cherenkov surface detectors
 - Created programs to monitor detector performance in real time
 - Used findings to design improved surface detectors being built at “Northern Auger Site” in Colorado
- **Case Western Reserve University** Cleveland, OH
Mark Gridley: SAGES department *Jan 2009 - Aug 2009*

- Designed a psychology study examining cross-modal perception of music
- Administered study to over 50 participants and analyzed results
- Co-authored a paper that was subsequently published in a peer-reviewed journal

Publications & Presentations

- [1] B. Weinstein, J. Aizenberg, P. Cluzel, and D. Nelson. On emergent macroscopic behaviors imparted by microscopic rules. In *DOE SCGF Fellows Annual Meeting 2013*, SLAC National Accelerator Laboratory, Lawrence Berkeley National Laboratory, July 2013. DOE SCGF. Poster Presentation.
- [2] B. Weinstein and J. Berezovsky. Simulating Magnetization Dynamics of Ferromagnetic Vortices. Technical report, Case Western Reserve University Department of Physics, Cleveland, May 2012.
- [3] B. Weinstein and J. Liu. A graphical interface for the plasma apprentice: Easier access to plasma physics knowledge. In *Princeton Plasma Physics Laboratory's Annual End-of-Summer Poster Session*, Princeton, NJ, August 2011. Princeton Plasma Physics Laboratory. Poster Presentation.
- [4] B. Weinstein, J. Liu, H. Mynick, and E. Feibush. A graphical interface for the Plasma Apprentice: Easier access to plasma physics knowledge. *Journal of Undergraduate Research*, 11, 2011.

Undergraduate Awards

- **Case Alumni Association Prize** Cleveland, OH
Case Western Reserve University 5/2012
 – Awarded to the graduating senior with the best academic record in the Case Western School of Engineering.
- **Elmer C. Stewart Memorial Award** Cleveland, OH
Case Western Reserve University 5/2012
 – Awarded to an outstanding senior in Physics who has demonstrated achievement in the applications of physics.
- **B.S. Chandrasekhar Prize** Cleveland, OH
Case Western Reserve University 5/2011
 – Received for demonstrating superior performance in physics.
- **Rochester Engineering Society Scholarship** Rochester, NY
Rochester Engineering Society 5/2011
 – Merit-based award recognizing outstanding engineering, engineering technology, science, or technology students from the Rochester area.
- **Outstanding Junior Award** Cleveland, OH
Case Western Reserve University 5/2011
 – Awarded to juniors with the best academic record at the end of five semesters in the Case School of Engineering.
- **National Edward O'Connor Scholarship** Cleveland, OH
Aerospace States Association 8/2010
 – Awarded to enterprising and innovative students planning to pursue career in Aerospace Engineering; only two scholarships given in the nation.
- **Case Alumni Scholarship** Cleveland, OH
Case Western Reserve University 5/2010
 – Competitive award given to undergraduates pursuing degree related to applied science.

- **Outstanding Sophomore Award** Cleveland, OH
5/2010
Case Western Reserve University
 - Awarded to sophomores with the best academic record at the end of three semesters in the Case School of Engineering.
- **Provost's Scholarship** Cleveland, OH
8/2008
Case Western Reserve University
 - Received when entering Case Western Reserve University based on high-school accomplishments (was high school valedictorian of class of 598 students).

Specialized Skills

- **Computational**
 - Secondary Field in Computational Science and Engineering (part of PhD)
 - * Significant experience optimizing programs to run on multiple processors, graphics processing units, and supercomputers.
 - * Expert at analyzing and visualizing “Big-Data”
 - * Excellent at designing and running simulations to gain insight into complicated problems
 - * Knowledge of stochastic methods to solve high-dimensional problems
 - *Software:*
 - * Languages for Scientific Computing:
 - Python, C++, CUDA, Matlab, Mathematica, Java
 - * Image Analysis Tools:
 - ImageJ, Python, OpenCV, OMERO
 - * Other Selected Languages & Programs :
 - Netlogo, Axiovision, Origin, Igor, Bash, L^AT_EX, Windows Powershell, Wordpress, HTML, CSS
 - *Hardware:*
 - * Build customized computers for scientific applications
- **Analytical**
 - Expert knowledge of Applied Mathematics, especially partial differential equations
 - Deep understanding of state-of-the-art equilibrium and nonequilibrium statistical physics methods
 - Expert knowledge of utilizing Mathematica to solve complex physical problems
 - Basic knowledge of Bayesian inference in data analysis
- **Laboratory**
 - Biology:
 - * Wet-lab experience
 - * Tissue culture room experience
 - Physics:
 - * Signal analysis instrumentation
 - * Spectroscopy, multi-channel analyzers, photomultiplier tubes
 - * Ultra-high vacuum surface science
 - * Ultrasonic methods to determine material properties
 - * Experimental methods to analyze chaotic systems

Certifications

- **Engineer in Training (EIT)** Ohio
September 2012
Active
 - Successfully passed Fundamentals of Engineering Exam

Professional Organizations

- Tau Beta Pi Engineering Honor Society
