

# Bryan T. Weinstein

Active TS/SCI Clearance

9 Sigmund Way  
Walpole, MA 02081

(585) 738-0690  
btweinstein@gmail.com

## Work Experience

- **MITRE** Bedford, MA  
*Lead Modeling & Simulation Engineer* April 2021 - Present  
*Senior Modeling & Simulation Engineer* August 2018 - April 2021
  - Rapidly developed innovative solutions to whole-of-government national security problems utilizing modeling, simulation, engineering, data science, and prototyping skills
  - Presented results to senior government stakeholders across the DOD and MITRE executive leadership to deliver maximum impact
  - Obtained and maintained TS/SCI clearance
  - Mentored dozens of staff and led diverse teams of various sizes across classification levels to produce high quality and timely deliverables for government stakeholders
    - \* One of CUIC's (Cross-Cutting Urgent Innovation Cell) first hires; helped train staff
  - Recognized as one of MITRE's most experienced AFSIM (popular GOTS M&S software) developers
    - \* Created MITRE's AFSIM user group in 2018 that now has over 400 members
    - \* Developed widely used MITRE repositories
  - Cohered over two million dollars in IR&D funding in conjunction with direct work over four years to build a next-gen C4 prototype
    - \* Presented multiple times at MITRE Research and Technology (R&T) meetings for hundreds of government sponsors
    - \* Work continues under ACCEL C2 lab; working to procure eight million dollar investment for classified lab from MITRE executive leadership

## Selected MITRE Awards

- **Trailblazer Award: Functional Architecture Deployment** December 2023
  - Awarded for demonstrating tenacity over the last five years; led a large team to enable distributed experimentation at the classified level through a next-gen C4 prototype (Functional Architecture).
- **Catalyst Award: CDAO Data Integration Layer Prototype Demonstration** May 2023
  - Awarded to team for delivering a prototype of an API Gateway to the Chief Data and Artificial Intelligence Office (CDAO) in response to a quick-turn two week request.
- **Trailblazer Award: Digital Twin JWICS deployment** May 2022
  - Given to our team for linking our next-gen C4 prototype to a classified dashboard using a series of Open APIs, and demonstrating this capability during MITRE's Research and Technology (R&T) showcase to hundreds of government sponsors
- **Trailblazer Award: Self Forming Kill Chains Analysis** May 2021
  - Recognized the impact of our analysis showing the benefit of novel decision aids at the army tactical level in partnership with OUSD R&E, Army Futures Command, and MIT Lincoln Labs
- **Breakthrough Award: Chief's Challenge Prototype** July 2020
  - Acknowledged our team's work rapidly creating an exemplar JADC2 prototype for the Air Force Secretary of Defense under a tight deadline

## Education

- **Harvard University** Cambridge, MA  
*PhD in Applied Physics* May 2018
  - Conducted experiments and developed probabilistic models & simulations to investigate microbial colonies' stochastic evolutionary dynamics on the surface of complex fluids and materials.
- **Harvard University** Cambridge, MA  
*PhD Secondary Field: Computational Science and Engineering (CSE)* May 2018
  - Mastered state-of-the-art computational methods used in scientific research and data science; completed advanced applied math and scientific computing courses
  - **Capstone:** Developed an award-winning OpenCL (GPU) powered Lattice Boltzmann fluid mechanics simulation utilizing OpenGL for real-time visualization.
- **Harvard University** Cambridge, MA  
*S.M. in Applied Physics* November 2014
  - GPA: 3.95/4.00
- **Case Western Reserve University** Cleveland, OH  
*Bachelor of Science in Engineering, Engineering Physics* May 2012
  - GPA: 4.00/4.00, Summa Cum Laude, Valedictorian
  - Engineering Concentration: Aerospace Engineering

## Selected Graduate Fellowships and Awards

- **Institute for Applied Computational Science Scholarship** Cambridge, MA  
*Graduate Student* September 2016 - September 2017
  - Wrote proposal and won a \$25,000 student scholarship from Harvard's Institute for Applied Computational Science (IACS)
  - Used funds to further develop my IACS capstone: an OpenCL-powered Lattice Boltzmann fluid mechanics simulator utilizing OpenGL for real-time visualization
- **Department of Energy Office of Science Graduate Fellowship** Washington, D.C.  
*Graduate Student* September 2012 - September 2015
  - Wrote proposal to win a competitive fellowship that supports students pursuing training in areas relevant to Department of Energy (DOE). Selected out of 1,300 applicants; 50 fellowships awarded
  - Attended yearly conferences at National Laboratories; presented posters on my active research, networked with other DOE fellows and government officials
- **Harvard University Pierce Fellow** Cambridge, MA  
*Graduate Student* September 2012 - September 2015
  - Won fellowship awarded to the highest caliber PhD students accepted into Harvard's School of Engineering and Applied Sciences (SEAS). Selected out of 150 students; 8 fellowships awarded

## Computational & Analytical Skills

- Over 12 years of experience optimizing programs to run on multiple processors, graphics processing units (GPUs), and supercomputers
- Expert at using Jupyter/IPython Notebooks to explore, visualize, and analyze large tabular datasets and large collections of images
- Experienced at applying stochastic techniques to model and solve high-dimensional problems
- Expert at rapidly creating new M&S software tools to answer novel questions
- Ability to create and calibrate mathematical models to data through core physics training
- Expert knowledge of Applied Mathematics, especially stochastic modeling involving the Master equation, the Fokker-Planck equation (PDEs), and (spatial) stochastic differential equations
- **Selected Government Software**
  - AFSIM, pymission, SBSS, C2S, milsymbol, *many* custom MITRE AFSIM/Python packages
- **Languages for General Scientific Computing:**
  - Python, Cython, OpenCL, CUDA, C, C++, Java, Mathematica, Matlab
- **Selected Python Packages and Tools:**
  - IPython/Jupyter Notebook, matplotlib, seaborn, colorcet, numpy, scipy, pandas, pandera, astrolib, scikit-image, pymc3 multiprocessing, cython, cython\_gsl, mako, PyOpenCL, pyCUDA
- **Selected Software Development Tools:**
  - Docker, CI/CD, GitLab, git, Django, REST APIs, Flask, FastAPI, Pydantic, JIRA, Nexus Registries, VS Code, PyCharm, vim, emacs
- **Fluid and Solid Mechanics Simulations:**
  - Lattice Boltzmann Method (custom-built code), OpenFOAM, SALOME, gmsh
- **Image Analysis Tools**
  - Python, OpenCL, ImageJ/Fiji

## Certifications

- **TS/SCI Clearance** MITRE  
*Active* October 2020
- **Secret Clearance** MITRE  
*Active* October 2019
- **Engineer in Training (EIT)** Ohio  
*Active* September 2012
  - Successfully passed Fundamentals of Engineering Exam, the first step towards becoming a licensed Professional Engineer (PE)
