Bryan T. Weinstein

25 Dighton St, Apt. 1 Brighton, MA 02135 (585) 738-0690 bweinstein@seas.harvard.edu

Work Experience

• MITRE Bedford, MA

Senior Modeling and Simulation Engineer/Analyst

September 2018

- Recruited many students at career fairs through academic engagement, and drew people to CUIC team (at least 4 people hired or interned)
- Helped save the Functional Architecture December demo for a sponsor
- Started the AFSIM user community at MITRE, taught many courses
- Attended AFSIM user community meeting October 2018
- Maintained interim security clearance
- Helped to point the Functional Architecture in the correct direction

Education

• Harvard University

PhD in Applied Physics

Cambridge, MA

May 2018

- Thesis Title: Microbial Evolutionary Dynamics and Transport on Solid and Liquid Substrates
- Advisors:
 - * David R. Nelson: Professor of Physics and Applied Physics, Solomon Professor of Biophysics
 - * Andrew W. Murray: Herschel Smith Professor of Molecular Genetics, Professor of Molecular and Cellular Biology, Director of FAS Center for Systems Biology
- Additional members of thesis committee:
 - * Christopher Rycroft
 - * Michael Brenner

• Harvard University

Cambridge, MA

PhD Secondary Field: Computational Science and Engineering (CSE)

May 2018

- Completed four advanced applied math and scientific computing courses
- Learned state-of-the-art computational methods used in scientific research
- Capstone: OpenCL GPU-powered Lattice Boltzmann fluid mechanics simulation utilizing OpenGL for real-time visualization.

• Harvard University

Cambridge, MA

November 2014

S.M. in Applied Physics

- Completed 12 courses: 4 physics core courses, 4 CSE courses, and 4 soft-matter/biophysics electives

- GPA: 3.95/4.00

• Case Western Reserve University

Cleveland, OH

Bachelor of Science in Engineering, Engineering Physics

May 2012

- GPA: 4.00/4.00, Summa Cum Laude, Valedictorian
- Engineering Concentration: Aerospace Engineering
- Senior Project: Simulating Interactions between Confined Spins and Ferromagnetic Vortices

• Fairport High School

Fairport, NY May 2012

High School

- GPA: 98.7/100, Class Valedictorian of 598 students

Bryan T. Weinstein 1 Spring 2017

Graduate Fellowships and Awards

• Institute for Applied Computational Science Scholarship

Harvard University Graduate Student

September 2016 - September 2017

- Wrote proposal and won a \$25,000 student scholarship from Harvard's Institute for Applied Computational Science (IACS)
- Used funds to develop a GPU-powered Lattice Boltzmann fluid mechanics simulation
- Certificate of Distinction in Teaching

Cambridge, MA

Bok Center, Harvard University

September - May 2016

- Won a teaching award based on my high reviews of "Introduction to Applied Mathematics" taught to undergraduates; obtained a 4.86/5.00
- Department of Energy Office of Science Graduate Fellowship Washington, D.C.

 Harvard University Graduate Student September 2012 September 2015
 - Wrote proposal to win competitive fellowship supporting students pursuing training in areas relevant to Department of Energy (DOE)
 - Selected out of 1,300 applicants; 50 fellowships awarded
 - Attended yearly conferences at National Laboratories; presented posters on my active research, networked with other DOE fellows and government officials
- Harvard University Pierce Fellow

Cambridge, MA

Harvard University Graduate Student

September 2012 - September 2015

- Won fellowship awarded to the highest caliber PhD students accepted into Harvard's School of Engineering and Applied Sciences (SEAS)
- Selected out of 150 students; 8 fellowships awarded

Summer Schools

• Marine Biological Laboratory Physiology Course

Student

Woods Hole, MA

June 2014 - August 2014

- Applied and accepted into intense 7 week course focused on intersection of experiment and theory in cellular physiology
- Learned how to use state-of-the-art microscopy to examine cellular behavior
- Interacted with leading cellular physiology researchers in daily lectures and seminars
- Course taught by Rob Phillips, Jennifer Lippincott-Schwartz, Wallace Marshall

Graduate Research

• Harvard University

Cambridge, MA

David R. Nelson & Andrew Murray: Physics, Molecular and Cellular Biology

Sept 2013 - Present

- Combined nonequilibrium statistical mechanics and experimental molecular biology to quantify the evolutionary dynamics of microbial range expansions
- Learned experimental biology techniques (trained in Dr. Andrew Murray's Lab)
- Captured images via microscopy; utilized Python and ImageJ extensively for analysis
- Devised algorithms to analyze and visualize large sets of biological data
- Developed agent-based and Lattice-Boltzmann simulations of range expansions in Python, C++, and OpenCL
- Used OpenFoam and the Lattice-Boltzmann technique to simulate fluid flows
- Created analytical models utilizing stochastic methods to predict experimental results

Specialized Skills

• Computational

- Secondary Field in Computational Science and Engineering (PhD minor)
 - * Significant experience optimizing programs to run on multiple processors, graphics processing units, and supercomputers.
 - * Excellent at designing and running simulations to gain insight into complicated problems
 - * Knowledge of stochastic and probabilistic methods to solve high-dimensional problems
- Software:
 - * Languages for Scientific Computing:
 - · Python, Cython, OpenCL, CUDA, C, C++, Java, Matlab, Mathematica
 - * Tools for Fluid Mechanics Simulations:
 - · Lattice Boltzmann Method (custom-built code), OpenFOAM, SALOME
 - * Image Analysis Tools:
 - · ImageJ, Python, OpenCL, OMERO
 - * Other Selected Languages & Programs :
 - · Netlogo, Axiovision, Origin, Igor, Bash, LATEX, Windows Powershell, Wordpress, HTML, CSS
- Hardware:
 - * Build customized computers for scientific applications

• Analytical

- Expert knowledge of Applied Mathematics, especially partial differential equations and stochastic methods
- Deep understanding of state-of-the-art equilibrium and nonequilibrium statistical physics methods

Laboratory

- 4 years of research in an experimental molecular biology laboratory; experienced at designing and conducting experiments
- Significant experience using microscopy to image microbes

Certifications / Clearances

Active

Active

• Engineer in Training (EIT)

Ohio

September 2012

 Successfully passed Fundamentals of Engineering Exam, the first step towards becoming a licensed engineer

• Interim Secret Clearance

MITRE, Bedford MA

September 2018

Professional Organizations

- Tau Beta Pi Engineering Honor Society
- American Physical Society

Teaching Experience

• Introduction to Applied Mathematics

Harvard University

September – May 2016

Teaching Fellow

- Undergraduate course taught by Christopher Rycroft. I obtained a 4.86/5.00 on teaching reviews
- Won a teaching award, the Certificate of Distinction in Teaching from the Bok Center, for the high teaching reviews

• Statistical Physics

Harvard University

Teaching Fellow

Fall 2017

- Graduate course taught by David Nelson, my PhD advisor. I obtained a 4.35/5.00 on teaching reviews

Outreach

• Adopt a Physicist

https://www.adoptaphysicist.org/

Classroom Discussion Facilitator

October 2018

- Answered questions about being a physicist to high school physics classes in an online forum
- Helped make students excited about physics

• STEM Inspiration Organization (SIO)

Newton, MA

Interview

October 2018

- Participated in hour long interview to organization supporting high school students interesting in pursuing careers in STEM fields
- Discussed my career trajectory and life lessons that I learned along the way
- Transcript of interview can be seen here

• Science in the News Presentation

Cambridge, MA

Physics of Evolution

November 2014

- Described how physics-based models can be used to predict evolutionary trajectories to the public in a 1.5 hour talk
- Presentation and was given to approximately 100 members of the public at Harvard Medical School
- Worked closely with teammates to create an effective presentation

Undergraduate CV

Undergraduate Research

• Rochester Institute of Technology

Rochester, NY

George Thurston: Physics

May 2010 - August 2012

- Studied liquid crystal mixtures in the eye related to cataracts
- Developed computer simulations and animations with Mathematica
- Demonstrated how liquid crystal composition affects the refractive index of the eye
- Validated simulations with experimental data
- Prepared results for scientific publication

• Case Western Reserve University

Cleveland, OH

Jesse Berezovsky: Physics

Aug 2010 - May 2012

- Examined control of optically active nanocrystal quantum dots (QDs) at room temperature using microscopic ferromagnet magnetization dynamics
- Studied novel combinations of QDs and microscopic ferromagnets using the "Object Oriented Micro-Magnetic Framework" developed by National Institute of Standards and Technology
- Analyzed data from simulations with Matlab and other Linux-based tools
- Created custom animations to visualize simulations
- Identified ferromagnet-spin interactions relevant to room-temperature quantum computing

• Princeton Plasma Physics Laboratory

Princeton, NJ

Harry Mynick: Theory and Computation Department

May 2011 - Aug 2011

- Participated in "Science Undergraduate Laboratory Internship" through Department of Energy
- Designed graphical front end for previously developed Mathematica program that calculated important plasma physics quantities
- Utilized state-of-the-art computer cluster for scientific computing
- Distributed redesigned program to plasma physicists for broad usage

• Case Western Reserve University

Cleveland, OH

Corbin Covault: Physics

Sep 2009 - May 2010

- Identified faulty equipment at the Pierre Auger Cosmic Ray Observatory by analyzing data collected by 1600 Cherenkov surface detectors
- Created programs to monitor detector performance in real time
- Used findings to design improved surface detectors being built at "Northern Auger Site" in Colorado

• Case Western Reserve University

Cleveland, OH

Mark Gridley: SAGES department

Jan 2009 - Aug 2009

- Designed a psychology study examining cross-modal perception of music
- Administered study to over 50 participants and analyzed results
- Co-authored a paper that was subsequently published in a peer-reviewed journal

Undergraduate Awards

• Case Alumni Association Prize

Cleveland, OH

Case Western Reserve University

5/2012

 Awarded to the graduating senior with the best academic record in the Case Western School of Engineering.

• Elmer C. Stewart Memorial Award

Case Western Reserve University

Cleveland, OH 5/2012

Bryan T. Weinstein 6 Spring 2017

 Awarded to an outstanding senior in Physics who has demonstrated achievement in the applications of physics.

• B.S. Chandrasekhar Prize

Cleveland, OH

Case Western Reserve University

5/2011

- Received for demonstrating superior performance in physics.

• Rochester Engineering Society Scholarship

Rochester, NY

Rochester Engineering Society

5/2011

 Merit-based award recognizing outstanding engineering, engineering technology, science, or technology students from the Rochester area.

• Outstanding Junior Award

Cleveland, OH

Case Western Reserve University

5/2011

 Awarded to juniors with the best academic record at the end of five semesters in the Case School of Engineering.

• National Edward O'Connor Scholarship

Cleveland, OH

Aerospace States Association

8/2010

Awarded to enterprising and innovative students planning to pursue career in Aerospace Engineering;
 only two scholarships given in the nation.

• Case Alumni Scholarship

Cleveland, OH

Case Western Reserve University

5/2010

- Competitive award given to undergraduates pursuing degree related to applied science.

• Outstanding Sophomore Award

Cleveland, OH

Case Western Reserve University

5/2010

 Awarded to sophomores with the best academic record at the end of three semesters in the Case School of Engineering.

• Provost's Scholarship

Cleveland, OH

Case Western Reserve University

8/2008

 Received when entering Case Western Reserve University based on high-school accomplishments (was high school valedictorian of class of 598 students).
